

What Makes Us Unique

All livestock owned by Goats R Us live out their natural lives at our ranch. They are vaccinated, treated for parasites regularly, and are provided with routine medical care. We have a convalescent community of retired working goats that receive special attention daily and enjoy a peaceful field.

We offer an organic vegetation management option:

- To clear fuel breaks for fire mitigation
- To become a part of the toolbox for creative landscapers and land managers
- To compliment cattle grazing projects

Goats R Us

Organic Weed Abatement

GOATS R US is a family owned and operated grazing company. Lifelong ranchers and animal enthusiasts, Egon and Terri Oyarzun began to provide organic weed abatement services using goats in 1994. With their young son, Zephyr in tow, they moved 54 'Charlie Brown goats' (old, handicapped, far less than perfect rescue animals) to residential neighborhoods to clear unwanted vegetation.

Today, the Goats R Us Team includes several thousand head of livestock, experienced South American herdsmen, working Border Collies, and a dedicated 24/7 support staff.

Goat grazing is widely utilized as a popular '**GREEN**' alternative tool for vegetation management.

- Reduces fuel loads for fire mitigation
- Grassland and riparian restoration projects
- Brush reduction
- Eradication of undesirable plants
- General clearing for construction and/or topography report purposes
