## Our Background

Combined we have:

- Over a decade of fire experience
- Current fuels reduction company officer in San Mateo County
- Long time rancher
- Experience in LE100 inspections
- Tree and brush removal experience
- Passionate and eager

## The current situation

- Decades of fire suppression and lack of fuels reduction
- High fire loading, dense under stories and continuous ladder fuels
- Choking out of native plants
- Residential developments are continuously intermixing with the wildland

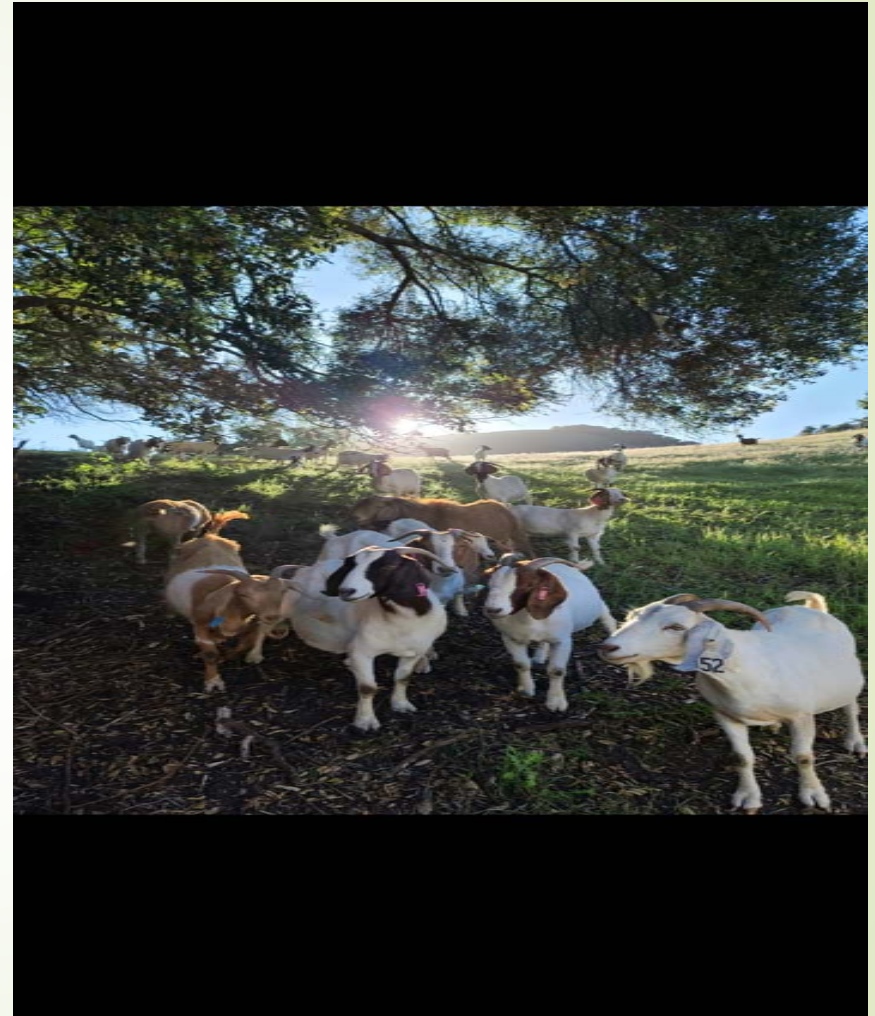

## Fuels reduction obstacles

- Fuel reduction is very time consuming
- Invasive and disrupts habitats
- Destructive
- Burning
- Noise polluting
- Spreads seed
- Chemical spraying is toxic

## Golden State Goats

- Our years of fire and fuels reduction experience provide an understanding of what your goals are and how to meet them.
- We understand industry terminology and defensible space requirements.
- Well taken care of herd that is vaccinated, supplemented and loved.
- We understand when our herd isn't capable of every task. Our chain saw experience and hard work will complete the job .
- You're hiring a local, knowledgeable and insured workforce.

## The herd

- Our herd works day and night to reduce fuel load.
- They are able to work in steep hard to reach terrain.
- They reduce both surface and ladder fuels.
- In a noninvasive, natural and economical manner
- Over 6ft of vertical clearing capability
- Nearly nonpolluting, nontoxic and carbon neutral.

## How It works

- We will meet with you at the job site and go over your vision of the finish product.
- Job sites are broken down into sections.
- Temporary electric fence is erected
- Livestock dogs and water are off loaded
- Goats/sheep are off loaded
- You will have 24/7 safe, reliable, cost effective and eager worker force.
- Once the area is at the desired level the fence and goats are moved to the next area.
- If desired my partner and I will clear what the herd can't.

## The Benefits

- Promotes the county in a positive light for using an environmentally friendly low impact way of reducing fuel loading.
- Draws community attention to fuel's reduction work being done locally.
- A very visual and memorable mark on the community.
- Shared on social media

## Benefits of fuels reduction

- Decreased fire risks
- Insurance rating
- LE 100 passing
- Safer communities
